## Declaration of Approval

### United Solar Ovonic approval of Danfoss Solar Inverters A/S transformerless inverters

Transformerless inverters from Danfoss Solar Inverters A/S of the type TLX are authorized for use with UniSolar PV modules and laminates

The approved types are:

- TLX 10k
- TLX 12.5k
- TLX 15k

The approval by United Solar Ovonic of Danfoss Solar Inverters A/S transformerless inverters type TLX is also valid for integrated solutions made by United Solar Ovonic partners.  
Please see <http://www.uni-solar.com>

United Solar Ovonic demands to the Layout of the PV installation:

Take into consideration that UniSolar PV modules and laminates produce higher voltage (+11%) and higher current (+4%) before initial degradation.

Please see Product and Application note Thinfilm applications 01 for additional information on thin film applications.

Date: 31-10-2008	Approved by  Danfoss Solar Inverters A/S
